

# The CVP Everest Packaging Solution.

See how the CVP works to save you time and money.

Fit-to-size auto-boxing technology measures, constructs, seals, weighs, and labels each hard or soft single- or multi-item order in one seamless process. It addresses key shipping industry challenges—from exponential increases in e-commerce orders to supply chain labor shortages and rising shipping and material costs.

1,000 parcels per hour is the new standard.  
Revolutionize your packaging process with auto-boxing technology.

**ONE, TWO, OR THREE CORRUGATE FEEDERS** use agnostic fan-fold branded or unbranded material for quick replenishment, reduced inventory, and usage savings.

**REDUCE LABOR COSTS** by eliminating 10-20 packing stations and ensuring smooth workflows even during peak production periods.

**REDUCE SHIPPING VOLUME** and freight costs with a correct-sized box for every order.

**TWO LID APPLICATORS** work in parallel to fully seal each custom box at high speeds.

**CARRIER COMPLIANT LABELS** are created and applied to ensure accurate delivery.

**SINGLE OR DUAL INDUCT STATIONS** to produce high-volume packing speeds and maximize operational efficiency.

**SCANNER CAPTURES 3D IMAGE** of each unique parcel to determine the box size required.

**INCREASE PRODUCTIVITY** as a fit-to-size box bottom is created around hard or soft single- or multi-item orders every three seconds.

**ADHESIVE SEALING** of the box bottom is secured by side guides for complete closure.

**LESS ENVIRONMENTAL IMPACT** by replacing material usage and box size for a smaller carbon footprint.
