CVP IMPACK

Automate
your way
to more
profits

Reduce or Eliminate Void Fill with a fit-to-size box, resulting in less damage and a greatly reduced per-unit cost.

Build the best box around the contents.

Sustainability is an increasing consumer concern and surveys consistently show that customers feel more positively about companies and brands that are consciously reducing the use of oversized packaging. The CVP Impack Automated Packaging Solution is able to reduce box sizes by up to 50% by producing a fit-to-size box for each individual order. Shortage of, and increasing costs of labour are a continuous challenge within fulfillment, the CVP Impack is able to replace 8 to 16 heads in the packing process ensuring consistent throughput - especially in peak.

TWELVE TO ONE

AVERAGE LABOUR COST REDUCTION

The competitive edge.

Fit-to-size packaging for the competitive edge in your industry.

Retail and E-commerce

3rd Party Logistics (3PL) and Fulfillment

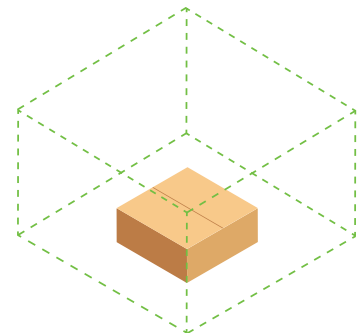

Manufacturing and Distribution

Wholesale

Our range of package sizes available allows for even greater shipping efficiencies.

Smallest Size

24cm W X 18cm L X 10cm H

Largest Size

60cm L X 55cm W X 40cm H

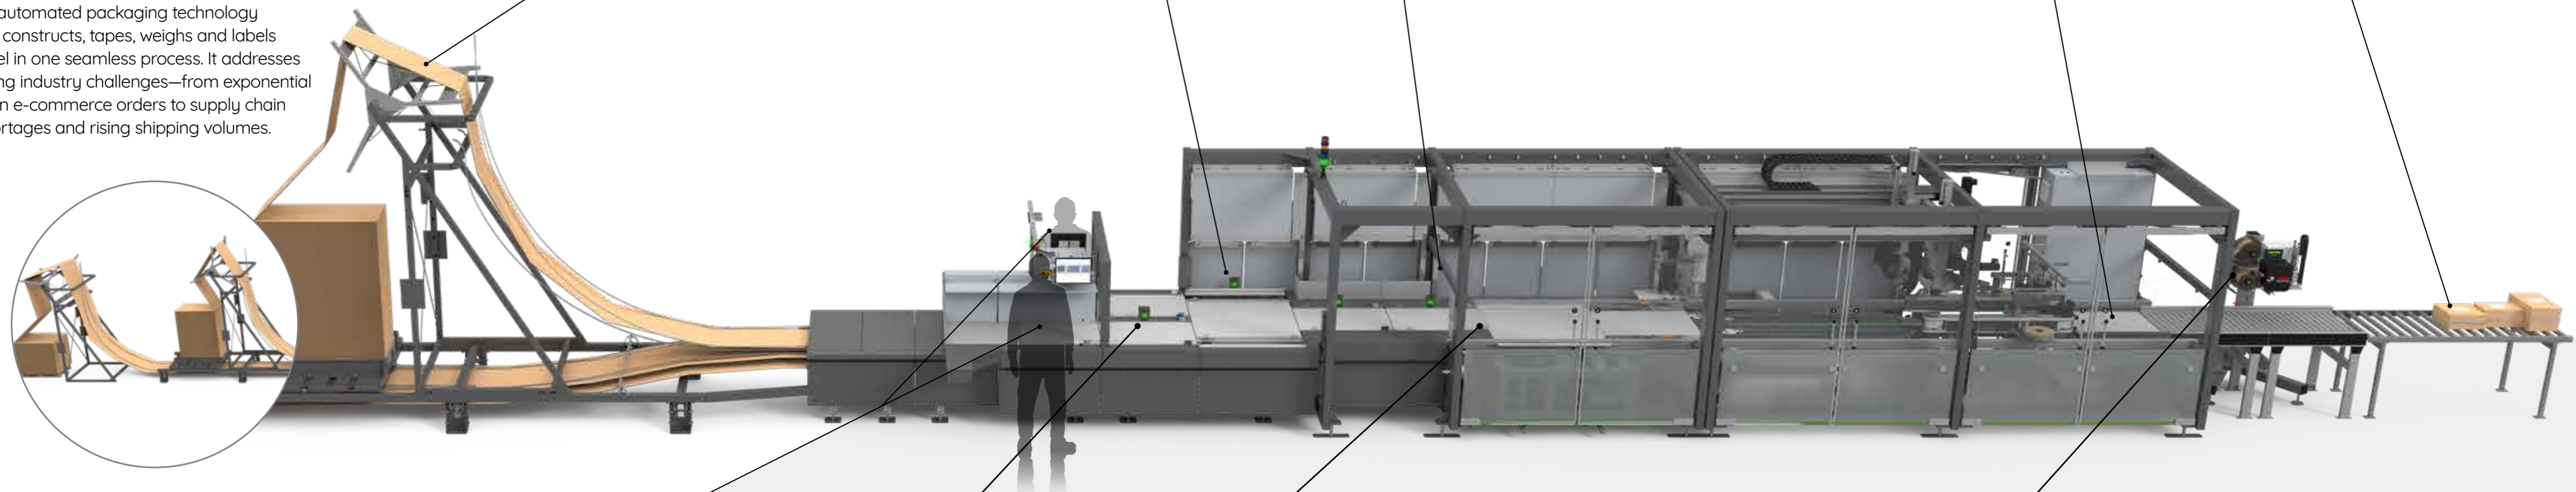

And all sizes in between

The CVP-Impack Automated Packaging Solution.

See how the CVP saves you time and money.

Fit-to-size automated packaging technology measures, constructs, tapes, weighs and labels each parcel in one seamless process. It addresses key shipping industry challenges—from exponential increases in e-commerce orders to supply chain labour shortages and rising shipping volumes.

Revolutionize your packaging process with automated technology.

One, two or three corrugate feeders use agnostic fan-fold material for quick replenishment, reduced inventory and usage savings.

Reduce labour costs by eliminating up to 16 packing stations and ensuring smooth workflows even during peak production periods.

Increase productivity as single- or multi-item orders are scanned and custom boxes are configured every 7 seconds.

Optional robotic arm inserts invoice or promotional materials for greater efficiencies.

Eco-friendly packaging and box size for a smaller carbon footprint.

Order weight verification optimizes rate shopping via an in-line scale, assuring accurate weight and measurements of each parcel.

Easy open box taped on 2 sides allows for easy open, recycling, or returns, improving the customer experience.

What packaging challenges do you want to solve?

Speed

Time is money. Automated packaging will increase throughput while using less corrugated and void fill.

Peak Seasons

Every year customer demands get higher and companies are pushed to the edge. Alleviate peak season packing challenges with automated packaging.

Sustainability

While fast delivery times continue to be a focal point, consumers also want to purchase from eco-friendly companies. Automate your packaging to strengthen your green initiatives.

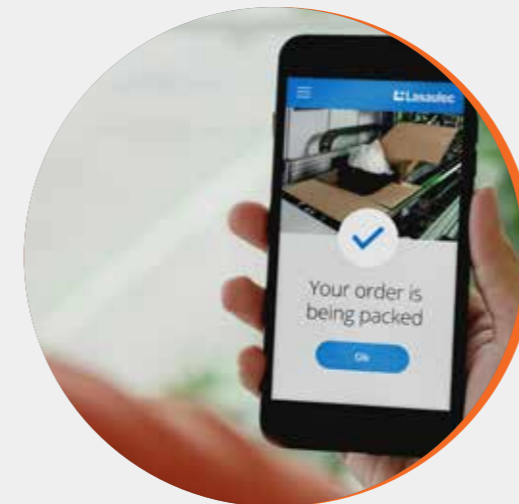

Single or dual induct stations to produce high-volume packing speeds.

Scanner captures 3D image of each unique parcel to determine the minimum box size required.

Customer experience notifications camera live streams customer's product being packaged for complete order visibility and less customer service calls.

Reduce shipping costs by creating the smallest parcel needed at the lowest expense.

Carrier compliant labels are created and applied to ensure accurate delivery.

Customer focused service solutions Quadient offers remote support, on-site scheduled service calls, and a dedicated OEM parts distribution center.

About Quadiant

Quadiant is the driving force behind the world's most meaningful customer experiences, by focusing on four key solution areas including Customer Experience Management, Business Process Automation, Mail-related Solutions, Automated Packaging Solutions and Parcel Locker Solutions.
